

Docker Cheat Sheet

Images, containers, Dockerfile, volumes, networks and Compose commands.

Images & Containers

Topic	Quick reference
Build image	<code>docker build -t myapp:latest .</code>
Run container	<code>docker run -p 8080:80 myapp:latest</code>
List	<code>docker ps</code> ; <code>docker ps -a</code> ; <code>docker images</code>
Stop/remove	<code>docker stop CONTAINER</code> ; <code>docker rm CONTAINER</code>

Debugging

Topic	Quick reference
Logs	<code>docker logs -f CONTAINER</code>
Shell inside	<code>docker exec -it CONTAINER sh</code>
Inspect	<code>docker inspect CONTAINER</code>
Stats	<code>docker stats</code>

Dockerfile Basics

Topic	Quick reference
Base	<code>FROM python:3.11-slim</code>
Workdir	<code>WORKDIR /app</code>
Copy/install	<code>COPY . .</code> ; <code>RUN pip install -r requirements.txt</code>
Command	<code>CMD ["python", "app.py"]</code>

Volumes & Network

Topic	Quick reference
Volume	<code>docker run -v \$(pwd):/app image</code>
Network	<code>docker network create app-net</code>
Port mapping	<code>-p host_port:container_port</code>

Compose

Topic	Quick reference
Start	<code>docker compose up -d</code>
Stop	<code>docker compose down</code>
Logs	<code>docker compose logs -f</code>
Rebuild	<code>docker compose up -d --build</code>
